The EvoShield Canes Texas Player Combine is structured to provide an authentic, professional, written performance evaluation to each player, as part of their commitment to our organization.

All players will receive a comprehensive, detailed, written performance evaluation. Only highly qualified coaches and instructors are allowed to obtain and record individual test data during this event; no other form of test data will be accepted. Hitters must provide their own wood bat.

All player evaluations will be used internally among our coaches and externally as a recruiting tool (for college baseball coaches or professional scouts). All players will take part in the full team scrimmage games held during the afternoon session; wood bats are required.

If you have any questions, concerns, or if you're requesting more information, please contact Michael League (mdleague24@gmail.com).
